ESI Meet™
for ESI eCloud PBX™ users

ESI Meet™ is the Video Conferencing and Screen Sharing application for *ESI eCloud PBX™* solutions. This browser-based application is available for Premier seats via the *ESI eConsole™* management dashboard. Hosts can create and manage video conference calls for up to eight participants, allowing users to meet virtually from anywhere, without having to gather in the same room or building!

Video Conferencing

This hosted web solution allows hosts to invite up to eight (8) participants for full HD video conferences (HD cameras required for HD video). ESI Meet™ hosts can invite non-eCloud users to the meeting.

Screen Sharing

Users can collaborate with other participants by sharing their computer screens (entire screen, application window, or a specific tab) in addition to other hosted collaboration features.

Key Features & Benefits:

- Meet from anywhere with an internet connection
- Supports a remote workforce and road warriors
- Invite up to eight participants
- Supports full-HD video (camera not included)
- Video quality can be adjusted based on available bandwidth to minimize network impact

- Share full-screen, application window, or a specific tab with all parties in the meeting.
- Chat, Raise/Lower Hand, and Mute all (audio and video) available
- Accessible via the ESI eConsole™ dashboard for Premier users of the ESI eCloud PBX™
