ESI eFax for Cloud
Secure Faxing for eCloud PBX™ users

ESI eFax for Cloud is a modern solution to the dilemma of faxing in an increasingly electronic world, providing securely encrypted faxing services without the use of a physical fax machine. *ESI eCloud PBX™* users can now send and receive faxes directly from the eConsole web-based dashboard, in addition to having them delivered directly to their email inbox. In addition to receiving faxes in the dashboard, they can also be sent as electronic attachments to the selected email address.

Secure Fax Services

ESI eFax for Cloud service features end-to-end encryption to ensure all faxes are secure, assisting end-users with their security requirements, such as TLS 1.2, HIPAA, and PCI DSS compliance.

Why should you use to *ESI eFax for Cloud*?

- Lower Cost of Ownership
  - No fax machine, no ink and paper to purchase, no equipment repair and maintenance.
- Location Flexibility
  - Send & receive faxes from anywhere in the world from your web browser (requires internet service). Since incoming faxes go to the dashboard or connected email inboxes, users have immediate access to their documents.
- Convenience
  - No more waiting by the fax machine for it to print or send. Receive and send faxes from anywhere.
- Go Green, Save Paper
  - There is no need for printing documents unless there is a need for a physical copy.
- Greater Security
  - Faxes are end-to-end encrypted, allowing users to maintain TLS 1.2, HIPPA, and PCI DSS compliance. This service is more secure than traditional fax since documents containing sensitive information will never sit out in the open on the fax machine.
- Easy Record-keeping
  - A log of incoming and outgoing faxes can be viewed within the eConsole dashboard.

ESI eFax for Cloud enables users to send faxes to fax machines or online fax numbers right from their web-based dashboard. This has a number of benefits over traditional email services, including:

- Sending documents via the dashboard directly to a fax machine or online portal.
- Achieving better legal authenticity through timestamps and accurate date certification.
- Accessing all fax files sent via the eConsole dashboard.

Considering switching to *ESI eFax for Cloud*?

If you think your business could benefit from our services that will enable you to maintain faxing functionality while freeing yourself from the physical resource burdens that traditional faxing entails, please contact the ESI Sales Team at (855) 213-4374.
